Career Objective

As an emerging software engineer passionate about building impactful digital solutions, I aim to join a top product-based company as a Software Development Engineer (SDE). I strive to enhance my expertise in web development, data structures, and machine learning while contributing to innovative projects that challenge my problem-solving abilities and foster continuous learning.

Profile Summary

As a passionate learner in the field of computer science, I thrive on challenges that push me to think creatively and analytically. My focus lies in building efficient solutions through coding and collaborative teamwork. I blend my technical curiosity with creative hobbies like singing and video editing, allowing me to approach problem-solving from unique perspectives.

Technical Skills

Programming Languages	Java, C++, Python
Web Technologies	HTML, CSS, JavaScript, React
Core Competencies	Data Structures & Algorithms (DSA), Machine Learning (Beginner)
Tools & Platforms	Git, GitHub, VS Code, Canva, Postman, Chrome DevTools
Soft Skills	Communication, Teamwork, Time Management, Problem-Solving, Creativity

Projects

Portfolio Website — A responsive, interactive personal portfolio showcasing my skills and projects, built using HTML, CSS, and JavaScript, and deployed on GitHub Pages.

Todo Manager — A lightweight task management web app using localStorage for persistence and minimal UI for daily productivity.

Weather App — A real-time weather dashboard integrating OpenWeatherMap API, displaying live temperature and conditions using asynchronous JS.
